

MARC KOEHLER

Marc Koehler is the CEO and Founder of Lead With Purpose – a company passionate about helping the everyday person lead a more purposeful and inspiring life. Marc has over 30+ years of life's leadership experiences including US Navy Submarine Officer, Interim CEO, Entrepreneur, Husband, Father, and soccer coach.

In 2005, Marc was feeling overwhelmed trying to manage the sea of infinity and chaos coming at him daily as a turnaround CEO and saw how 14-hour work days were impacting his health, his marriage, and his family. Frustrated, Marc tapped into his time as a US Nuclear Submarine Officer to create a simple set of powerful purpose-based tools and best practices that helped him to get every employee aligned and rowing together in the same direction. Marc then decided to apply these same tools to himself and his family and saw how it helped him to become healthier and more successful as a husband and father.

In these two thought provoking talks, Marc takes the audience on his life's journey sharing both inspiring and heart wrenching personal stories from the US Nuclear Submarine Force and as a turnaround CEO, Husband, and Father. He then shares the blueprint that any person can use to achieve more harmony and balance in their life.

PRESENTATIONS

The Alignment Blueprint

The average company is only 9% aligned and only 30% of employees are fully engaged in their work. Marc presents not only the challenges, but also a simple one-page alignment plan that any person can use to implement the four simple shifts that leaders need to make to get their employees 100% aligned and engaged in less than 60 Days.

Achieving Harmony

70% of Americans report not being able to find any type of work-life balance. With the speed of life continuing to accelerate, families are feeling overwhelmed and disconnected. Marc presents the major challenges that he faced daily juggling life and shares how creating a One Page Family plan helped him to take back control of his life and achieve more harmony and balance.

WHAT PEOPLE ARE SAYING

"I was very impressed with the presentation on the One-Page business organizational plan. What he presented was so SIMPLE to understand, yet covered all the Leadership and Management Goals, etc. that any business needs to be successful! It is SIMPLE and yet looks like it would be SO VERY EFFECTIVE for any business owner, large or small."

"It was like I was meant to hear this. Almost like a reset, and a refocus on areas I can be better, and we can be better as a family. I just had about an hour and a half talk with my wife about everything... and that mainly is because of Marc. What he does has a profound impact on people's lives."

"This really opened my eyes and I found emotions that had been buried deep within my heart. I now understand how to make those first steps towards balance."
